COMMENTS: WC2XPF has has provided an interesting news program that targets interests in world news as well as providing a medium for developing RTTY capabilities for both amateur radio and short wave listerners. Presented material fits the category of "general human interests" without any offensive materials that one finds frequently on commercial broadcasts. I recommending issuing a permanent license so that George Hutchison can to perform this community service.

COMMENTS: Hi ! I'm a seek and sock typist so my provider shuts me down, since they think there is no activity...hi hi I'll send you my comments by E-mail later today.. But for now, what is 85R shift, that you use on your TTY transmissions???? 73 es CUL Stan W9LG w9lgstan@aol.com

The later Note From Mr. Garstka reads as follows: (Re-formatted for easier reading)

Hi !

Here are my comments about the RTTY Broadcasts from WC2XPF...

I've been a RTTY enthusiast since getting into Amateur Radio TTY during the 1960's...For the past 20 or 25 years the only RTTY that I could print was from Amateur Radio QSO's.....

About two weeks ago, while scanning the short wave freqs, I heard the familiar sound of 170 shift, 60 speed, RTTY signals, so I turned on the old reliable 15, and there it was, eurica, I found what Ive been looking for..

It was a good feeling to copy TTY again, and copy the current news.....

I sent an E-mail to ARRL and to QST magazine regarding your RTTY broadcast, because I'm sure there are other TTY enthusiasts that would like to print something more interesting than routine Ham Jibberish.....hi hi

I've been tuned in whenever propagation is good, and find that your material is excellent...

In addition, the quality of the station signals, is as good as any I've ever heard, and it is very obvious that the operation of WC2XPF shows great professionalism.....

Thanks for putting WC2XPF on the Air. 73 Stan W9LG

COMMENTS: To whom it may concern,

I use the transmissions of WC2XPF to do testing and expirmentation of radio teletype circuits and software for filtering and demodulation. They supply a consistent and reliable source which allows me to schedule my time for tests and expirmentations. Prior to WC2XPF reliable on-air signals were hit and miss.

Tim Haake WA0TSY

COMMENTS: I recently became aware of RTTY.com's broadcasts through a commercial bulletin board (Grove/MT). I am a former US Army Signals Intercept Operator (MOS 98G) who enjoys listening to international broadcasts on shortwave. I am not a Ham operator, therefore, I do not have the "interface" with others to communicate via non-voice methods. I have been aware of the various types of non-voice communications for some time, and my obvious interests/history in this area has led me to academic research on these modes, but no practical experience. Ham-to-ham communications are difficult for me to locate, and despite my past experience, I am not in this to "read other people's mail". I quite enjoy the opportunity to receive intended broadcast material in this manner and look forward to continuing to do so.

Additionally, recent unpleasantness' have demonstrated the need to exploit any and all means of communication available. Cable, satellites, land-line and cellular telephones all have finite bandwidth and stability. It would be a shame to lose such an infrastructure-independant medium of

communication and information dissemination (broadcasts I have copied contain mostly relevant international/national news).

I just wished to add my support to the continuation of these broadcasts, and to let everyone know that it is enjoyed by non-licenced, listen-only radio operators.

My preferred method of contact is via e-mail and I will enthusiastically respond if there are any further questions or support I can provide.

COMMENTS: Just a small gripe.

Why do you insist on listing your transmitting schedules and times in PST?
Nobody outside the US uses PST. It just seems the usual USA-centric view of
the universe. Why not list the times in GMT/zulu and put PST in brackets
for those poor souls who cannot convert one into the other.

Please don't go off the air just yet. I have finally blown the dust off my
Model 15 and would like to get it back into working condition.

74 de Jim

COMMENTS: For once the shortwave bands are being put to decent use. This is the kind of thing we need more of. As apposed to the beggers on the high power stations, who claim to be non-profit and do nothing but beg for money. I have stopped listening to them!! Too boring..... WC2XPF needs to have government support for Homeland Defense. This could be a key asset in the coming terrorist attacks. We need to upgrade their power and antenna systems. Maybe they could use part of the old VOA site and antenna system. A good co-use of a Government asset and civilian operation. This is done at various air bases throughout the world. CAFB(Charlston, SC is an example). Renew this license....without doubt.

Cory Hine/N2AQS/AFA4TZ USAF MARS

COMMENTS: RTTY is just one form of the many modes of communications (CW, AM, etc.) which has contributed to the overall evolution of modern radio as we think of it today.

I appreciate the efforts that has been put forth by the people at rtty.com to help keep this part of our communications history alive and well.

They are doing an excellent job in helping to know where we have been and how we got here, so we will have a better idea of where we are going as we head on into the future.
